

Pathway Developer Release 2022.21

Summary of Changes

Pathway Developer Release 2022.21 contains the following:

About Box

This displays the **Pathway Developer** version number and **QOF** version.

• DM&D Codes are now available for Wales, Scotland and Northern Ireland Previously, Pathways for these countries could only be authored using READ2 codes, now DM&D codes can be used for medication items.

Blood Pressure Data Entry

The **Blood Pressure** data entry form has been enhanced to include validation on the values to minimise data entry errors, and labels added to indicate the correct boxes for the systolic and diastolic readings.

• Display Attachments, Hyperlinks and Images within Templates The functionality to display attachments, hyperlinks and images within a template has been enhanced to show/hide these based on logic relating to user input.

Display all Clinical Description text within Templates

The clinical description box now automatically resizes and displays the full text.

Practice Reports - Display Report Run Date in the Title Bar

When running the **Practice Reports** these can be run for any date, the date now displays in the **Title Bar**, so that it's easy to see the **Report Date** when viewing the report.

Practice Reports - Change Report Date

Previously, after running a report it would need to be closed to change the date, now a user can select the **File** tab and select a new date to re-run the report.

• Mail Merge - Define Value/Comment associated with a Clinical Term

Default comments or values can be added to a clinical code by the **Pathway Author**, enabling these to be automatically added to the patient record when a **Mail Merge** is performed.

Mail Merge - Confirmation Notification

On completion of a **Mail Merge Bulk Insert**, a notification displays "Bulk insert process has completed".

Pseudonymised CSV file includes Report Date and Run Date

When creating a pseudonymised CSV file within **Category Analysis**, this now includes the **Report Date** and **Run Date** within both the file name and as additional columns within the file.
