

Radiology in Pathology

Overview

In SIS 10070, all Chapter 5 Radiology Read codes are included in the Bounded Read code list. This means that practices who receive the NHS003 PMIP pathology messages from their Laboratory can now process radiology reports in the same way they currently do with pathology messages, ie radiology messages can be read, actioned and filed on the patient record. Please check with your laboratory if you are unsure whether you receive these messages.

The screenshot shows the 'Mail Manager' window with a list of incoming messages. The selected message is a 'Pathology Message' titled 'xray left leg' received on 15/06/2011 at 14:41. The message content is as follows:

Status	Type	Read	Date	Staff	Patient	Action/Subject	Copy	From
Processing error	Pathology Message	<input type="checkbox"/>	15/06/2011 14:41				No
